Color code and Abbreviations

Queens from one strain, but mated by drones from another strain .
 Their population and daughters (and drones of them) are F₁ crossed.

Queen and Drones have the same ancestors: combination to increase or stabilize some characteristics

Queen and/or Drones have unknown exact origin : that makes unable to find their real status.

Queen and Drones result of a cross between two different lines : interesting to increase their resistance and qualities.

Breeders

- (-) Brother Adam †1996 (Karl Kehrlé)
- (BA): Foundation
- MKK : Pierre de Koning (NL)
- MKR : Bram de la Rie (NL)
- MKY : Erol Yilmaz (NL)
- PJ : Paul Jungels (LU)
- PN : Horst Preissl & Johannes Neuberger (AT)
- PS : Poul Erik Sørensen †2012(57) (DK)
- TR : Thomas Rueppel (DE)
- WP : Wolfgang Pientka (DE)

Races – Do use them

- A: anatolica
- B: buckfast
- G: cecropia (Greek)
- MG: Margret's hive No 5
- NO: N° 62
- T: macedonica Athos

Importation mode

- icl : Eggs imported (colony exchange)
- ieg : Eggs imported (brood comb)
- imq : Laying queen imported
- itq : Tested queen imported
- itq74 : ???
- itq76 : ???

Mating Places, etc

- bal : Baltrum island (DE)
- hbpn : Preissl-Neuberger mountain (AT)
- inez : Instrumental insemination (DE)
- inhj : Instrumental insemination
- lgn : Langeneß island (DE - Wattenmeer)
- mrk : Marken peninsula (NL)
- nex : Neksælø island (DK)
- rud : Ruden island (DE - Baltic sea)
- shr : Sherberton (Dartmoor, GB)
